

**Quick Installation Guide**  
**Premium Fixed Frame Screen**

Thank you for your purchase of our Premium Fixed Frame Screen. Our screen is your ideal solution for home theatre, conference room, classroom and other projection needs. This guide will walk you through the screen basics and the easy installation process.

## Installation Procedures

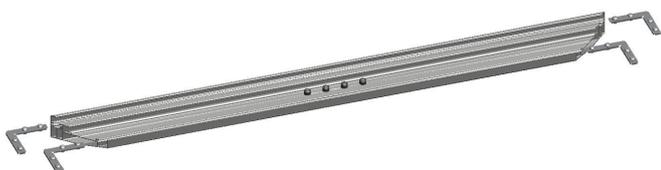

1. First open the package, take out all the accessories as follows:

2. Place a soft-clean cloth on the ground or other flat surface of the area where the screen will be assembled.

3. Connect the short frame into long frame. Do not tighten completely until all frame pieces are assembled correctly.

4. Connect the Elbow Joints to top and bottom sections of the vertical frame. Once inserted, connect the vertical sections to the horizontal frame sections. Make sure all corner frames pieces are connected with no gaps. They should form perfect right angles.

5. Insert the glass fiber bars into the slots of the fabric.

6. Face down the fabric on the platform, and place the frame on it as the below pics shows.

- 1) Install the springs to 4 corners
- 2) Place support bar in the middle position.(only available for large sizes )
- 3) Use the spring hook to install all springs one by one

7. Measure the hole distance H, and drill holes on the wall for screws with same distance and keep 5mm outside. Position the fixed frame screen onto the wall.
